

I currently use a cb radio, It is non-modified and has an output of 4 or 5 watts my antennae is only 14 feet above the tree that it is attached to. There are about 75 or 100 trucks operating within 3 blocks of my house. the problem is that my neighbor(1) complains that I cause interference on his tv, I've tried to work with him and he said for me not to use my radio, which seems a bit unfair.

Any suggestions?

Thanks
